

**COSMOS
GROUP**

MOBILIZING KNOWLEDGE
INTO SOLUTIONS

Mission Statement

To strengthen our leadership profile by providing the most efficient and cost effective services to our clients, be it in energy, mining, shipping, information technology, media, or any endeavour to benefit our future.

Our Vision

To serve as the preferred partner in providing quality services & solutions to our stakeholders & clients.

Cosmos Group

The Cosmos Group was established in the newly independent Bangladesh in 1973, but the roots of this multi-sector conglomerate date back to the early part of the 20th century.

The entire Indian subcontinent, stretching from the unforgiving highlands of Gilgit-Baltistan in the northwest, to the maritime port of Chittagong in the southeast was occupied by the British. The city's importance as a major route of trade and commerce in South Asia had been established well before the British arrived. This occurred before Columbus discovered America in 1492. Records have proven Arab and Chinese traders plying the southern Silk Route, and trading at the port as early as the 9th century. The people of Chittagong are recognised for their enterprising yet understated manner with regards to trade and commerce. The instinct for business coupled with the desire to excel has been passed down through generations of the 'Chadtgaiya' entrepreneurial class. Amanat Khan was a prominent member of Chittagong society. His philanthropic activities in the education sector saw him appointed as one of the first Indians as a member of the Legislative Assembly under the British, despite being of the independence-minded Swaraj Party. Amanat Khan was the grandfather of the present group CEO of Cosmos, Enayetullah Khan.

Mr. Amanat Khan was an active trader by the standards of the market, and maintained strong interests in the shipping industry as well; so it came as no surprise when he was appointed as the first chairman of the Chittagong Port Authority. This winning combination of visionary leadership, social commitment and targeted philanthropy has formed the cornerstone of the Cosmos Group's moral blueprint.

The thread laid down by the late Amanat Khan allowed the nascent Cosmos Group to expand. Cosmos Group began operations in the trading industry with shipping interests. It was in the heady days that followed the founding of Bangladesh. In less than four decades, Cosmos has grown into a large conglomerate with a significant presence in fields as diverse as oil & gas, power, mining, telecommunications, instrumentation, shipping and logistics, media, manufacturing and trading, with a footprint that is increasingly global. An expansion strategy underpinned by diversification runs the risk of quality dilution. The companies within the Cosmos family have managed to avert this hazard by continually holding specialised human resources at a premium. Staff's personal development is held as integral to an unwavering commitment toward adhering to the group's corporate positioning our Group as a Bangladeshi conglomerate with a truly international outlook.

At the heart of this vision is an unshakeable faith in Technology for Empowerment (TFE); serving as an unprecedented force for delivering a level playing field in global commerce. We are ready, willing, and able to render a distinctly Bangladeshi touch to humanity's story of progress. Cosmos Group continues to engage strategies to define, distinguish and differentiate Bangladesh on it's own merits.

Pablo Picasso | *Centaure et bacchante avec un faune*, 1947 / Gallery Cosmos collection

Salvador Dalí | *Homage to Fashion*, 1971 / Gallery Cosmos collection

Enayetullah Khan, a Renaissance man with diverse interests, is founder of Cosmos Group which now incorporates over a dozen companies operating at home and abroad. He is also founder of WildTeam and co-founder, Symphony of the Earth.

As a media entrepreneur he established the United News of Bangladesh (UNB), the first fully digitalized wire service in South Asia and is the founder editor of the 'Dhaka Courier' – a national newsweekly, Gallery Cosmos and CosmosAtelier71 – a printmaking studio. Apart from being an entrepreneur, he is passionate about promoting and preserving history and heritage. Khan is also involved in environmentalism centering on the Royal Bengal Tiger and is an avid promoter of art and music.

Khan is the author of *The Bangladesh Sundarbans*, one of the world's largest mangrove forests and a UNESCO World Heritage Site, Bangladesh: *Splendours of the Past*, on Bangladesh's archeological heritage, and *Boats: A Treasure of Bangladesh*, on the dying art of boat making in Bangladesh.

Khan, a music aficionado played a pivotal role in the formation of Bangladesh's first pop band, Uccharon. More recently he acted as Executive Producer of award winning film "Natir Puja – The Court Dancer" – a 3D recreation of Rabindranath Tagore's only film and "The Damascus Cover" – a film based on a novel authored by Howard Kaplan.

Besides Dhaka, Khan divides his time between Singapore, Connecticut and Vancouver, while dabbling in cookery and photography. He is active as a nature & heritage conservationist and is a global citizen striving for the promotion of environmental and cultural awareness amongst nations.

Cosmos Energy Services

Cosmos Energy Services (CES) entered into operations in 1982 and was incorporated as a limited liability company in 1997. It has successfully completed a number of supply and turnkey contracts in the oil, gas and power sectors, and has recently invested significantly in the mining and minerals sector of Bangladesh. CES has built up a wealth of professional experience and in-house technical skills, with staff including highly-qualified geologists, geoscientists, economists, and electrical, mechanical and civil engineers who have unrivalled experience of working in the petroleum and power sector.

In the Oil and Gas Sector, as one of the leading companies involved in the industry in Bangladesh, CES has earned the distinction of being the only private sector company to have undertaken petroleum geology and reservoir study on the acreage in exploration blocks of Bangladesh, in collaboration with Corelab / BAPEx / Petrobangla. CES takes pride in being associated with a number of prestigious projects in Bangladesh, including the development of the first oilfield in Bangladesh at Haripur and first offshore platform at Sangu built by KBR.

CES is active in providing EPC of gas-processing plants, gas pipeline construction, supply of drilling materials, drilling rigs, line pipes and oilfield seismic and drilling services.

CES also provides consultancy, logistics and local mechanical, electrical and civil engineering support and services to the national oil companies (NOCs) and international oil companies (IOCs) operating in Bangladesh in both downstream and upstream activities.

CES is now poised to enter into oil, gas and coal exploration and development with international JV partners.

Power Sector

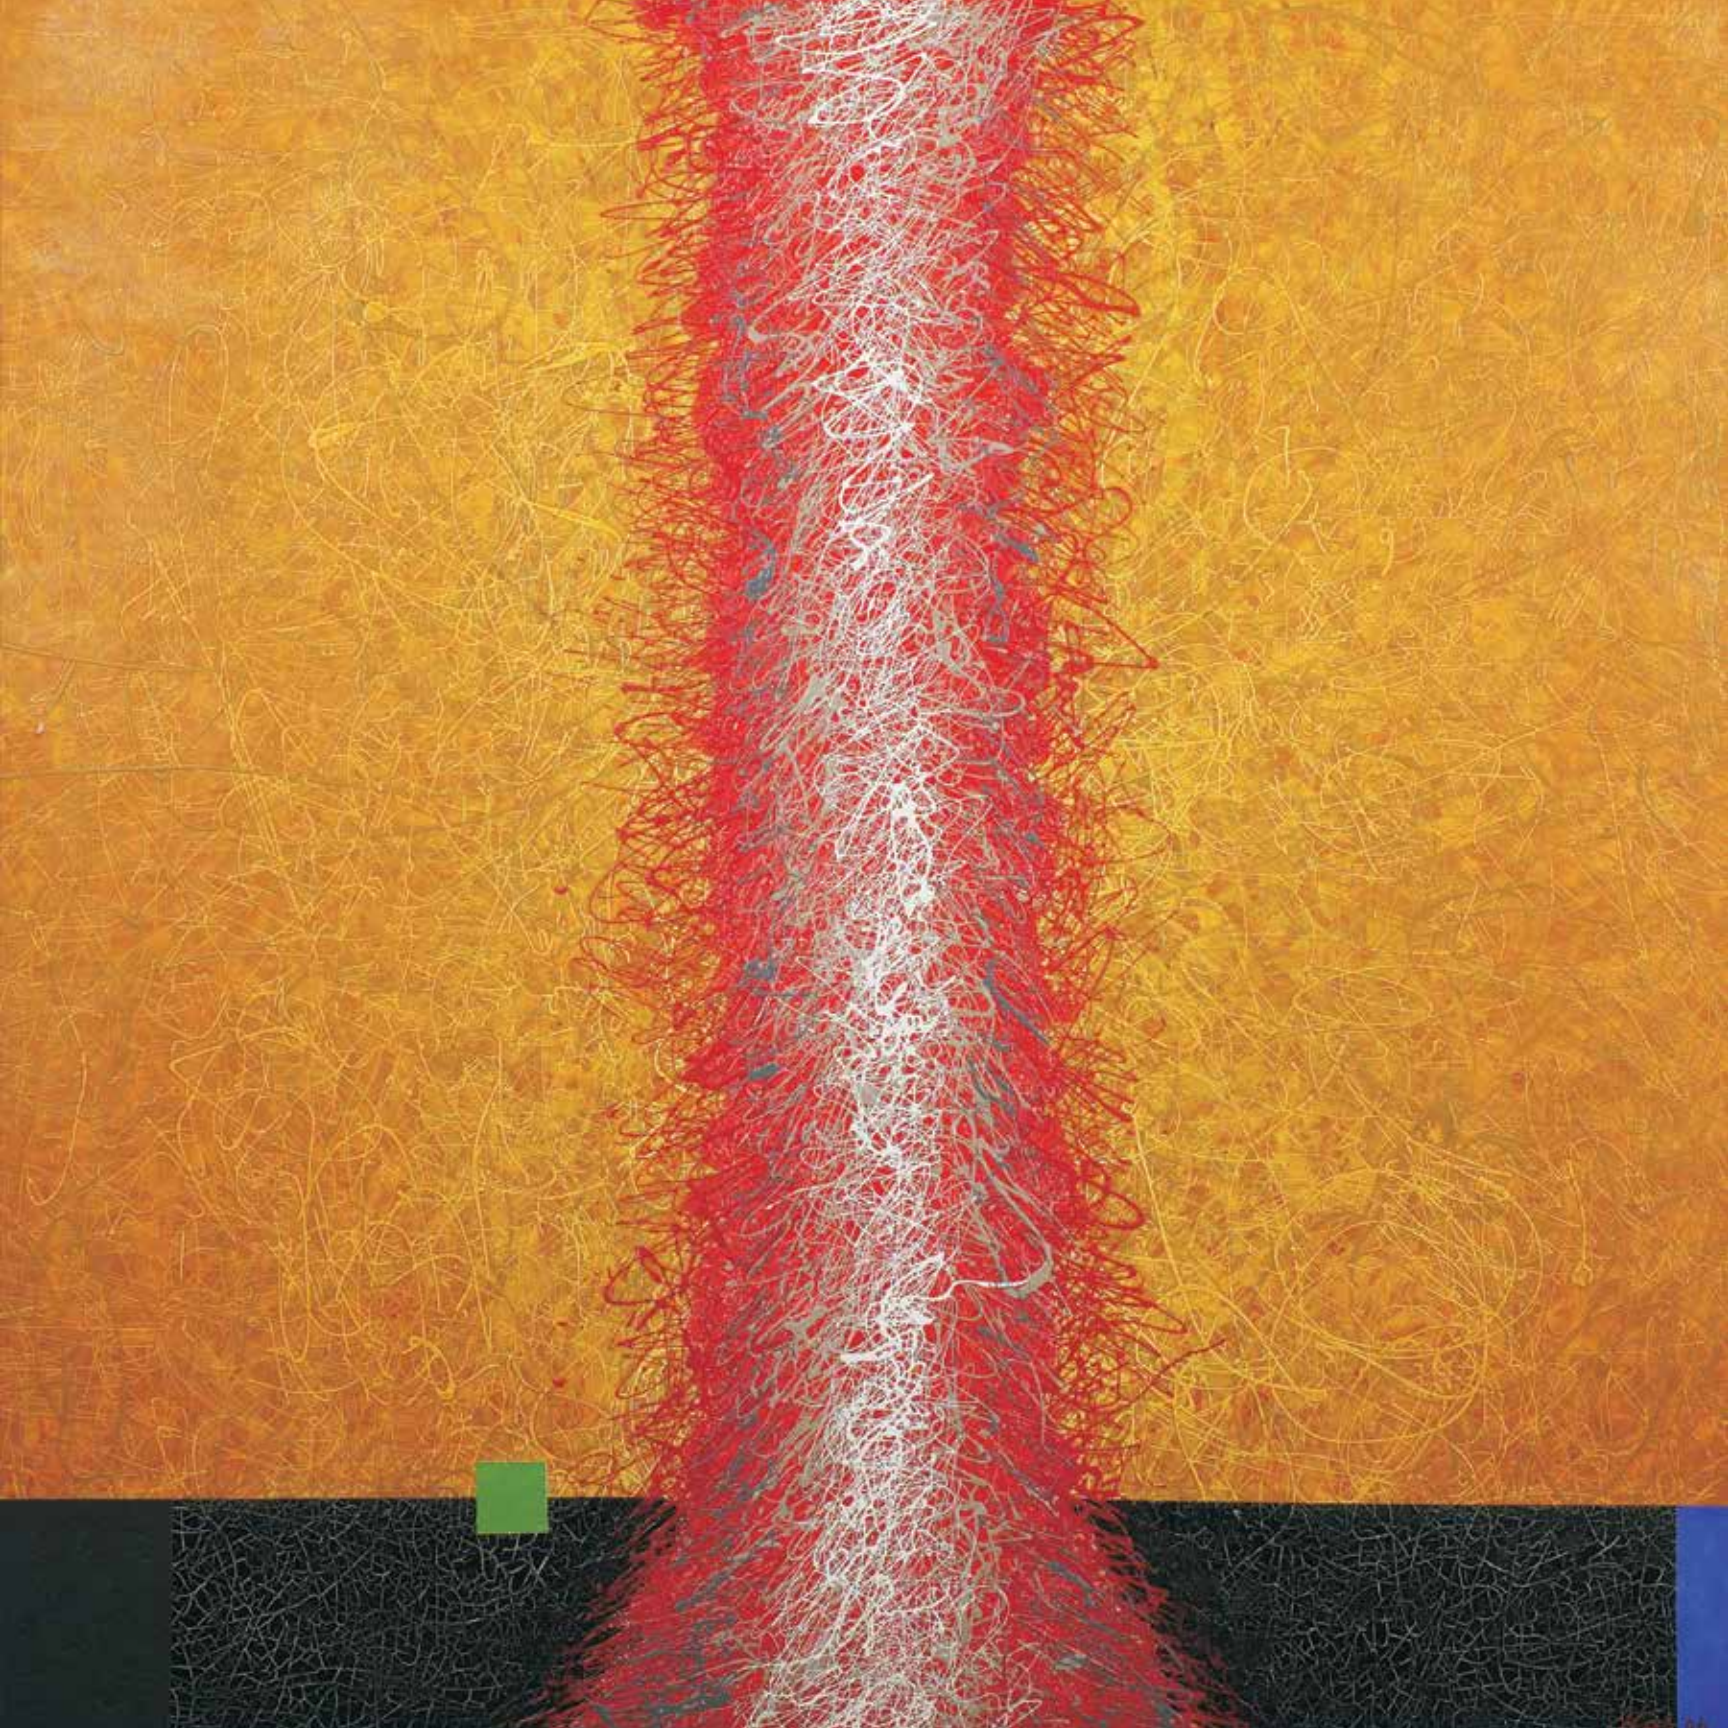

CES was the first Independent Captive Power Producer in the country. CES built a 10MW gas-engine power plant for the Scan Cement factory in Bangladesh, under a joint venture with the Rolls Royce Power Venture, UK. CES is involved in operation and management of power plants, substations, transmission lines and supply of power transformers, switchgear, conductor and major electrical equipment. CES in-partnership with Mahkota Technologies (formerly GEC Malaysia), is credited for building the first 230KV substation for PGCB. It is the first organisation in Bangladesh to attain the ISO 9001 Certification in respect of O & M of the Captive Power Plant.

Automation & Instrumentation

CES has been established as the leading process instrumentation company in Bangladesh. Cosmos Instrumentation serves gas fields, refineries, fertilizer plants, gas process plants, power plants, metering stations, and chemicals industries. These range from specific products such as valve, measurement, analytical and control equipment to complete integrated solutions for the industries.

Resources Sector

Cosmos has undertaken significant investment in mineral sands exploration and mining in Bangladesh. We have equity interest in Premier Minerals Ltd., Bangladesh, the operating arm of Premier Minerals Limited Singapore, an exploration and mining company with investments in Bangladesh and Australia. This industry will bring many benefits to Bangladesh. This venture includes import substitution, massive GDP growth, employment, new regional industries, significant flow of income to the government, and the creation of many new job skills. CES is also involved in the Maddhapara Hardrock Mining project in Bangladesh.

Cosmos Telecom

Established in 1986, Cosmos Telecom (CT) (Pvt) Ltd. provides project-based support, procurement and construction support, as well as system integration to our partners. CT has an engineering team to provide support for satellite, microwave, and outside plant projects.

CT takes pride in providing a strong and experienced professional team. With our youthful zeal and wide range of experience, we are emerging as a major force in the telecom sector in Bangladesh. It is with the aforementioned, and support of our strong partners, we shall achieve our mission—TechnologyFor Empowerment.

CT represents Sabena Aerospace Engineering S.A., Belgium which is leading independent and international aviation solutions provider for civil and military operators.

By 2020, Sabena Aerospace will be one of the most recognized independent aviation services provider in the EMEA countries for delivering unique and innovative solutions to both regular and complex needs. Sabena Aerospace is aiming at becoming a worldwide proximity partner, bringing its expertise wherever needed.

CT is experienced in carrier relations for voice, data, mobile and fixed, satellite business. We also have Value Added Services through the state run telecom, BTCL, as well as private ILDs. CT partnered with Sicap, AG, a company providing various value added services and platforms to the mobile operators in Bangladesh.

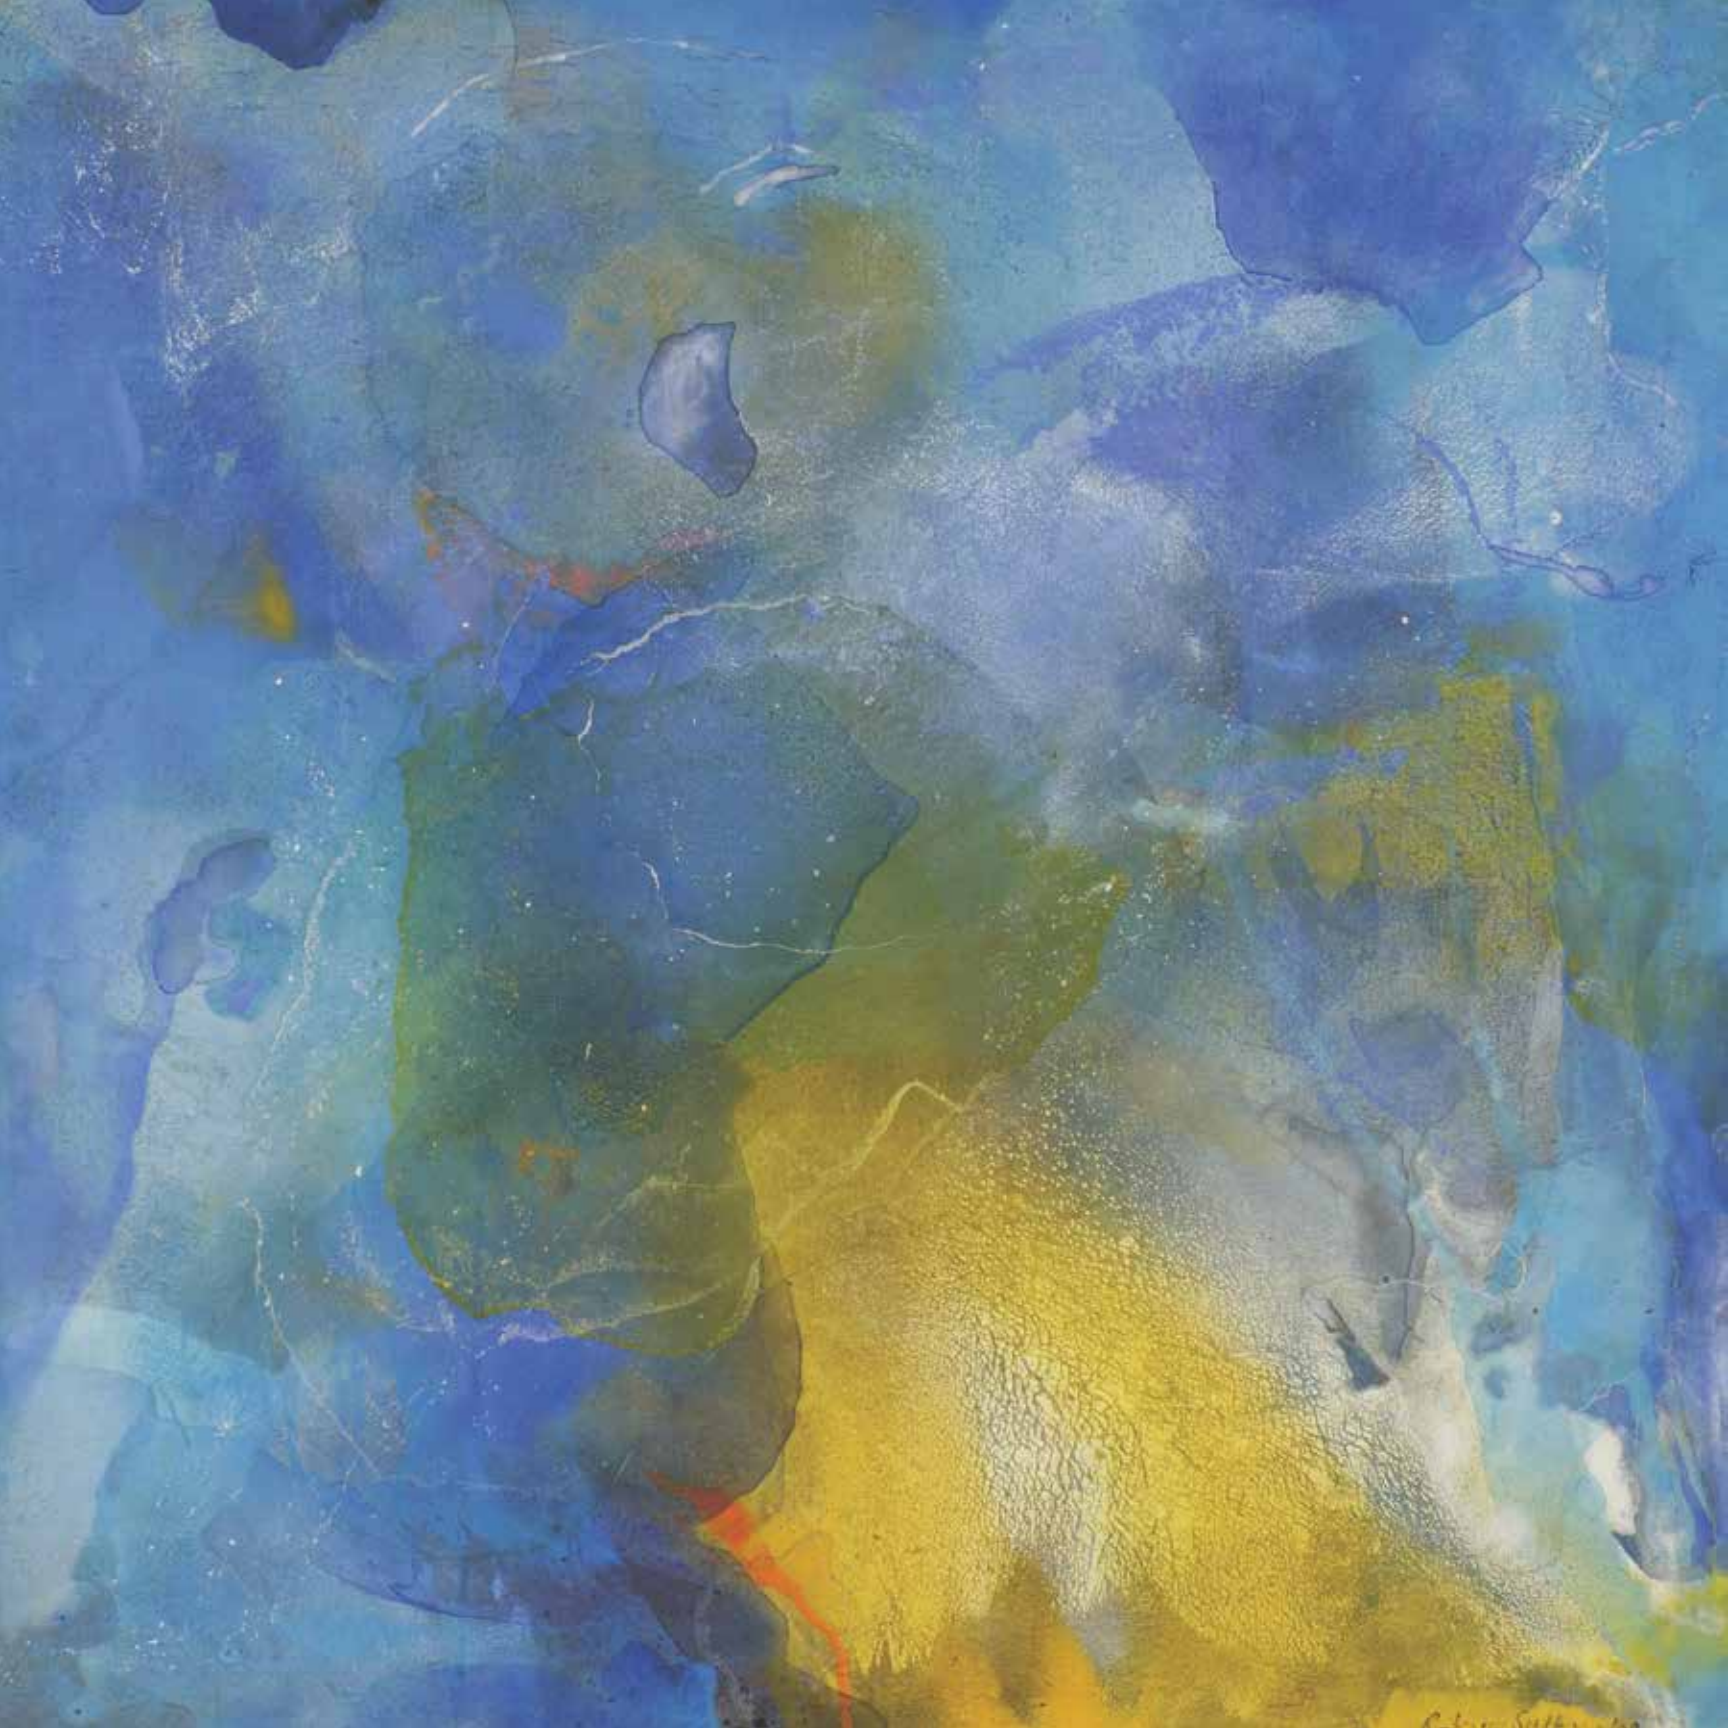

CT has been the pioneer in accomplishing numerous projects in Bangladesh. A prime example was in 1989 with the help of Nokia, CT established the largest radio microwave communications project funded by Finnida; which remains the premier source of communication in the domestic circuit.

CT worked with Thales. Thales installed the radar and monitoring system of the Dhaka International Airport. CT completed the primary and secondary radar installation and upgraded the ATC at the international terminal. Thales has been awarded IFE contract for Bangladesh Biman's new Boeing aircrafts.

CT in association with Sofrecom, the consulting arm of France Telecom, which conducted a study on “Choosing the Right Technology” for the Bangladesh Telegraph & Telephone Board (BTTB). A similar report was prepared for GrameenPhone, the largest mobile operator in Bangladesh with the help of Telemate.

CT supervised the development of the premier news management and delivery software for United News of Bangladesh (UNB), the largest aggregator of news and information in Bangladesh that falls under the media wing of the Cosmos Group.

Cosmos Technologies

Cosmos Technologies has a Master Agreement with Kymeta Corporation which is commercializing software-enabled metamaterials-based electronic beamforming antennas and terminals for satellite communications. Kymeta's new mTenna™ suite of satellite antennas are ultra-thin and use a holographic approach to electronically acquire, steer and lock a beam to a satellite. The flat, lightweight and cost-effective satellite tracking antennas are designed to work seamlessly for communication in high-volume markets where traditional satellite antennas are not currently practical or feasible, such as automotive, maritime, and aviation.

Kymeta Corporation was founded in August 2012 after spinning out of Intellectual Ventures. Kymeta announced commercial availability of its first products – the mTennau7 antenna subsystem module (ASM) and KyWay™ terminal – in March 2017, which are the first metamaterials-based products to be successfully commercialized. Kymeta has also partnered with Intelsat, operator of the world's first Globalized Network, to offer KALO satellite services, which can be bundled with all Kymeta products. Kymeta has also raised almost \$200 million in funding, the company's largest investors include Bill Gates, Liberty Global, Lux Capital, and Osage University Partners.

Cosmos Technologies has entered into multinational partnerships with Doshion, the Allahabad-based water management company and Veolia; the French pioneer in water supply and management services which provides cutting edge water solutions to the Bangladesh market.

Cosmos Technologies will unveil this exciting partnership to help Bangladesh avail the water management techniques and services helping mankind leverage its use of this increasingly scarce, hence precious natural resource.

Cosmos Technologies is also an Internet Service Provider (ISP) and is currently establishing partnership and teaming with Syniverse Technologies, a global company that provides technology and business services for the telecommunications industry. Syniverse's core service areas include roaming, network and database, business intelligence solutions and interoperability services.

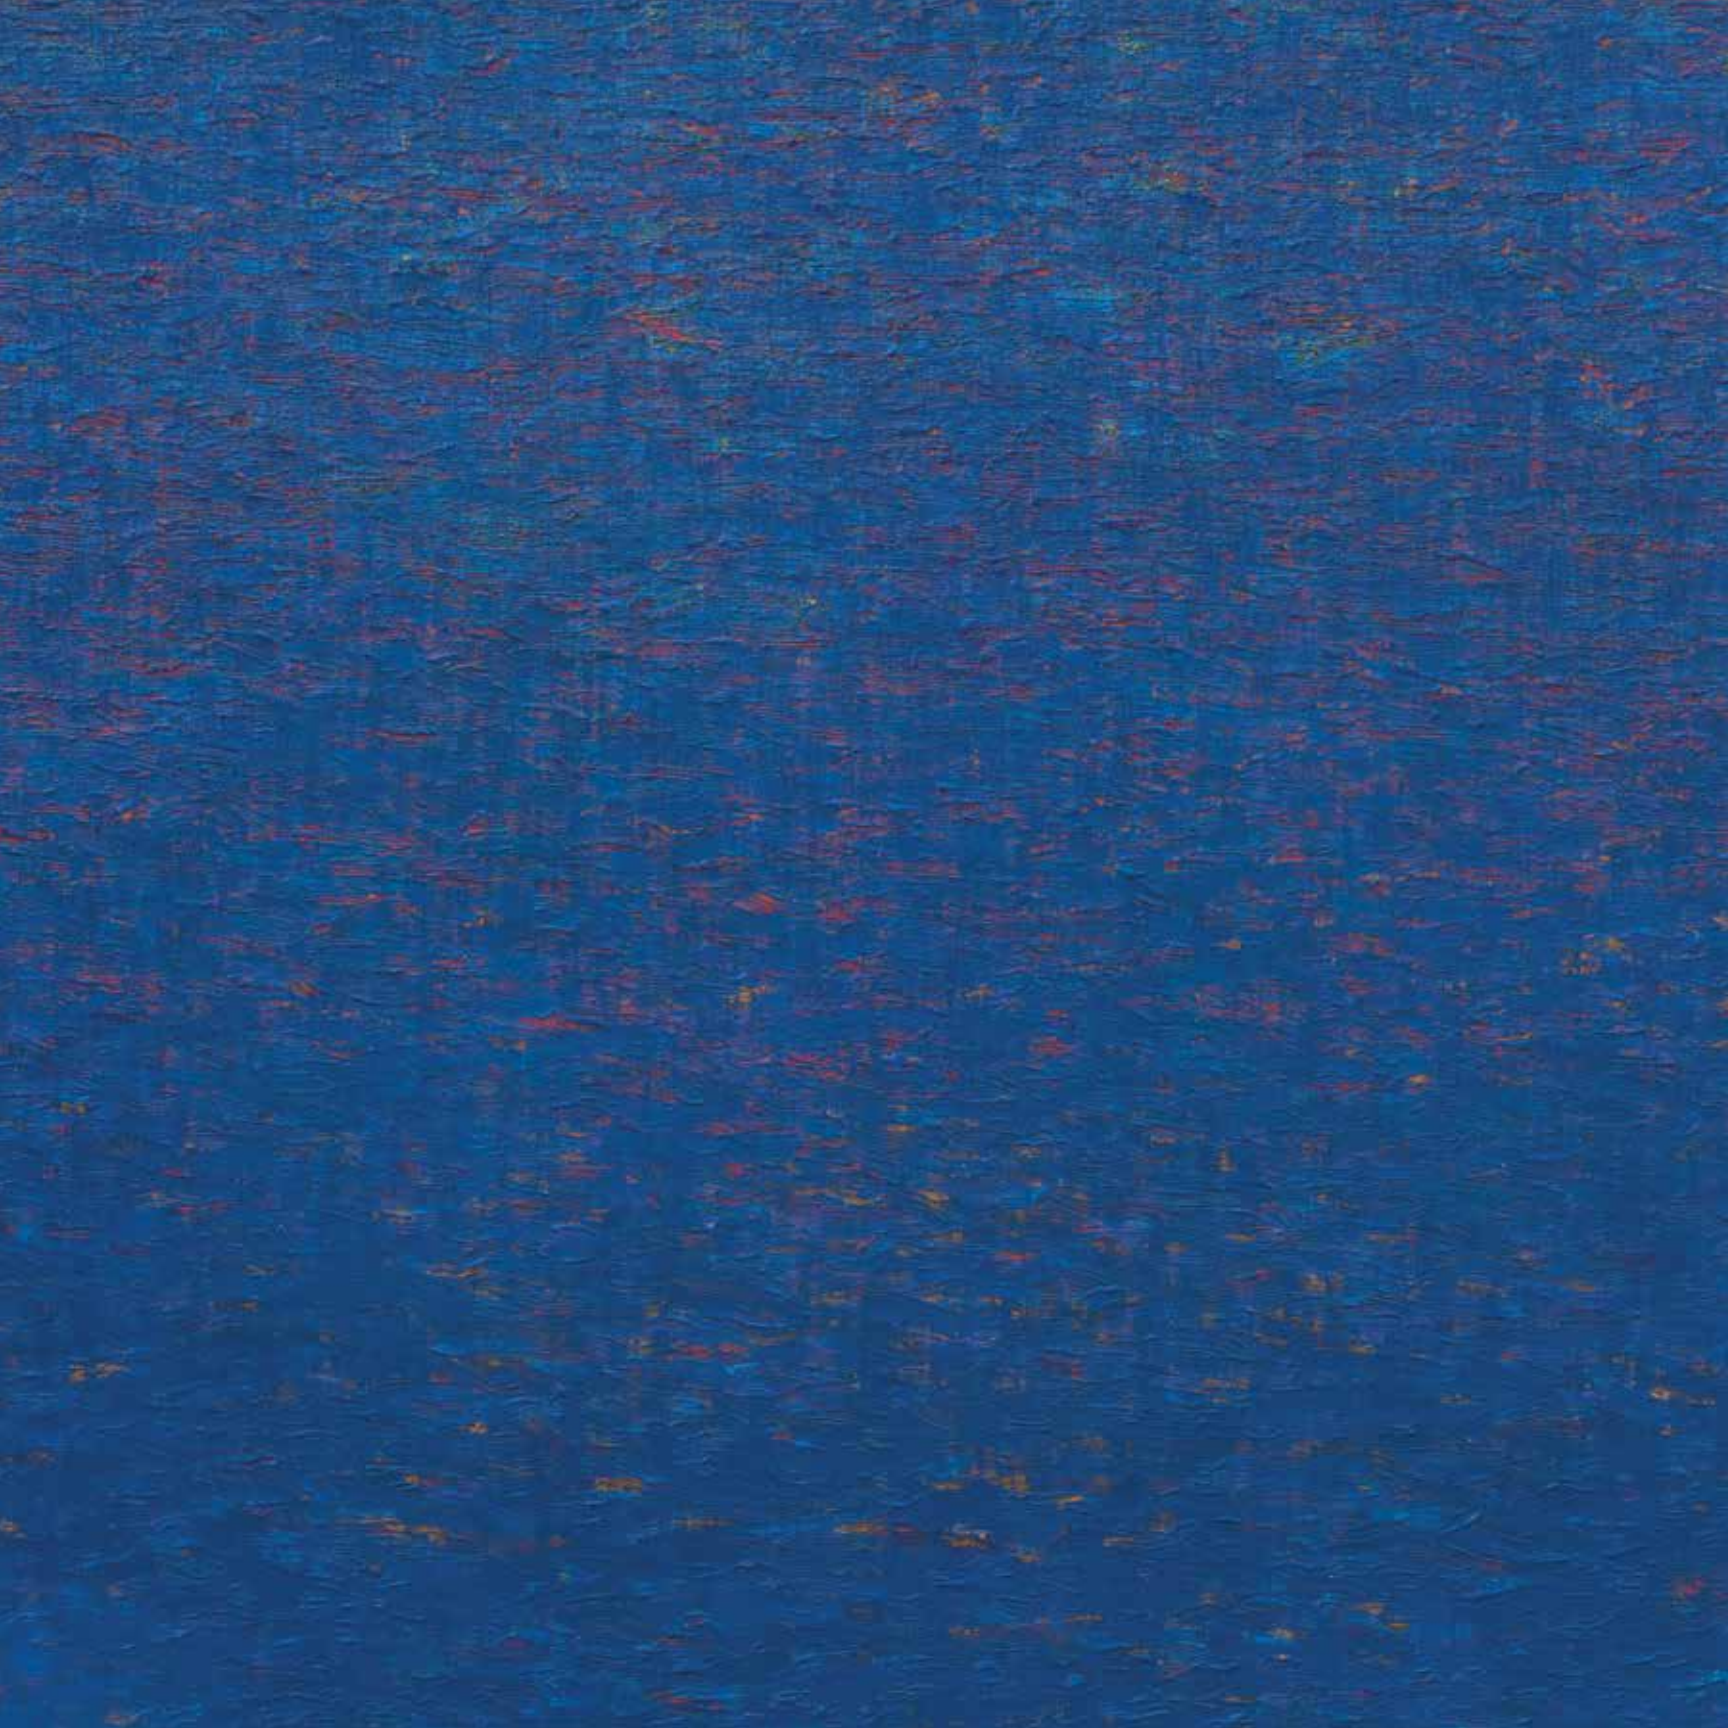

Cosmos Marketing Consultants

Since its inception in 1981, Cosmos Marketing Consultants has grown rapidly. CMC made its entry into the international field with wide-ranging and diversified activities including promotion and marketing of products, supervisory, logistic and technical services regarding telecommunications, energy, roads and highways in association with multinationals. In an effort to support environmental programme management, bulk commodity trading in industrial raw materials, chemicals, cement, coal and fertilizers, we are currently conducting market research and surveys, techno-economic and feasibility studies at both micro and macro levels. The promotion of international joint ventures, investment in industries, businesses and services is our prime focus.

CMC's activities span railways, seaports, roads, bridges, as well as other infrastructure projects.

Salvador Dali | *Space Elephant*, 1980 / Gallery Cosmos collection

Newdredgeco Bangladesh

Newdredgeco Bangladesh is involved in production, collection, and cleaning of dredge spoil and sand from Bangladesh's extensive network of rivers, chars, shoals, islands and authorized dredging paths throughout the land and Bay of Bengal.

NB trades in the dredge spoil and sand that will inevitably result from the upcoming dredging projects of the government aimed at improving the navigation throughout waterways.

Civic Engineering

Since 1982, Civic Engineering has been undertaking engineering, procurement, construction projects throughout the length and breadth of Bangladesh. In assurance for the country's security and surveillance infrastructure, Civic has focused its work in the energy sector, working in gas field development projects, downstream facilities building, terminal construction, LPG plant, and power plant construction. In keeping with the Cosmos Group's overall business philosophy, the individuals who work at Civic have in-depth knowledge in the fields of civil and structural engineering. In order to achieve the highest quality and economy, Civic employs experts in their field and appoints advisers and consultants with vast experience to partner and endorse our mission.

With trained manpower, Civic has the machinery and equipment, as well as the sources from where it can procure any such facilities that are required to complete projects undertaken in an orderly and timely fashion.

Cosmos Shipping and Logistics

Cosmos Shipping and Logistics (CSL), the maritime arm of the Cosmos Group, was established in 1980. CSL aims at offering efficient agency services to foreign vessels calling at the Bangladesh ports. The company has become one of the country's largest handlers of cargo in terms of tonnage. We maintain offices at the port cities of Chittagong and Khulna/ Mongla. CSL offers clients services to ship operators/ owners, charterers' agents/brokers, freight forwarders, and shipbreakers. Cosmos Shipping Lines (CSL) provides efficient transportation and freight management service to our customers - safely, on time, and within budget. We are committed to the continual improvement for the quality of our services. CSL has enjoyed years of growth and substantial diversification; while consciously maintaining high standards of quality and service. Cosmos Shipping provides full service agency representation for its principals. CSL recognizes the importance of developing efficient global supply-chains as good transport logistics provide the competitive edge.

CSL's expertise in shipping enables expedition of all types of cargo - breakbulk, containers, dry bulk, liquid bulk, steel and project cargo - from vessels to the inland consignees, CSL provides similar services on out-bound shipments through our partners overseas.

CSL is a leading logistical support and transportation company in Bangladesh and handles intricate jobs for clients. From transporting heavy and light equipment and materials throughout the country, Cosmos has found that organising the supply of incoming and outgoing goods can account for 10% of their costs.

LOGISTICS

- Warehousing
- Bulk Cargo Operations
- Project Logistics
- Engineering, Equipment
- Container Logistics Management
- Stevedoring
- International Freight Forwarding
- Logistics Management Application

INFRASTRUCTURE

- Surface Transportation
- Cargo Terminals
- Terminal Management
- Container Rail Operations
- Container Depots
- Port Development

AGENCY & SERVICES

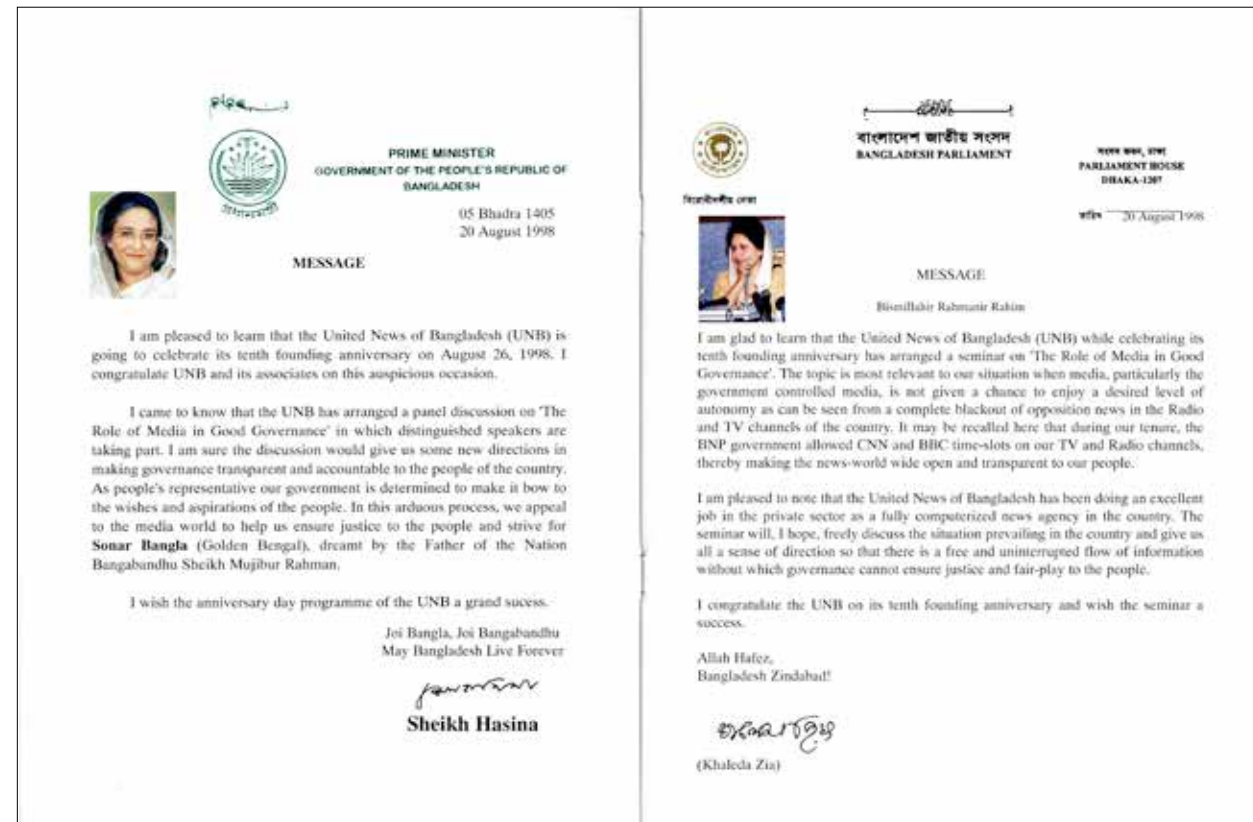

- Support Services for Oil & Gas Industry
- Support Services for Power Industry
- Chartering Brokers
- Crew Recruitment
- Ship Management
- Shipping Agency
- Clearing & Forwarding
- Support Services for Dredging Operations

United News of Bangladesh (UNB)

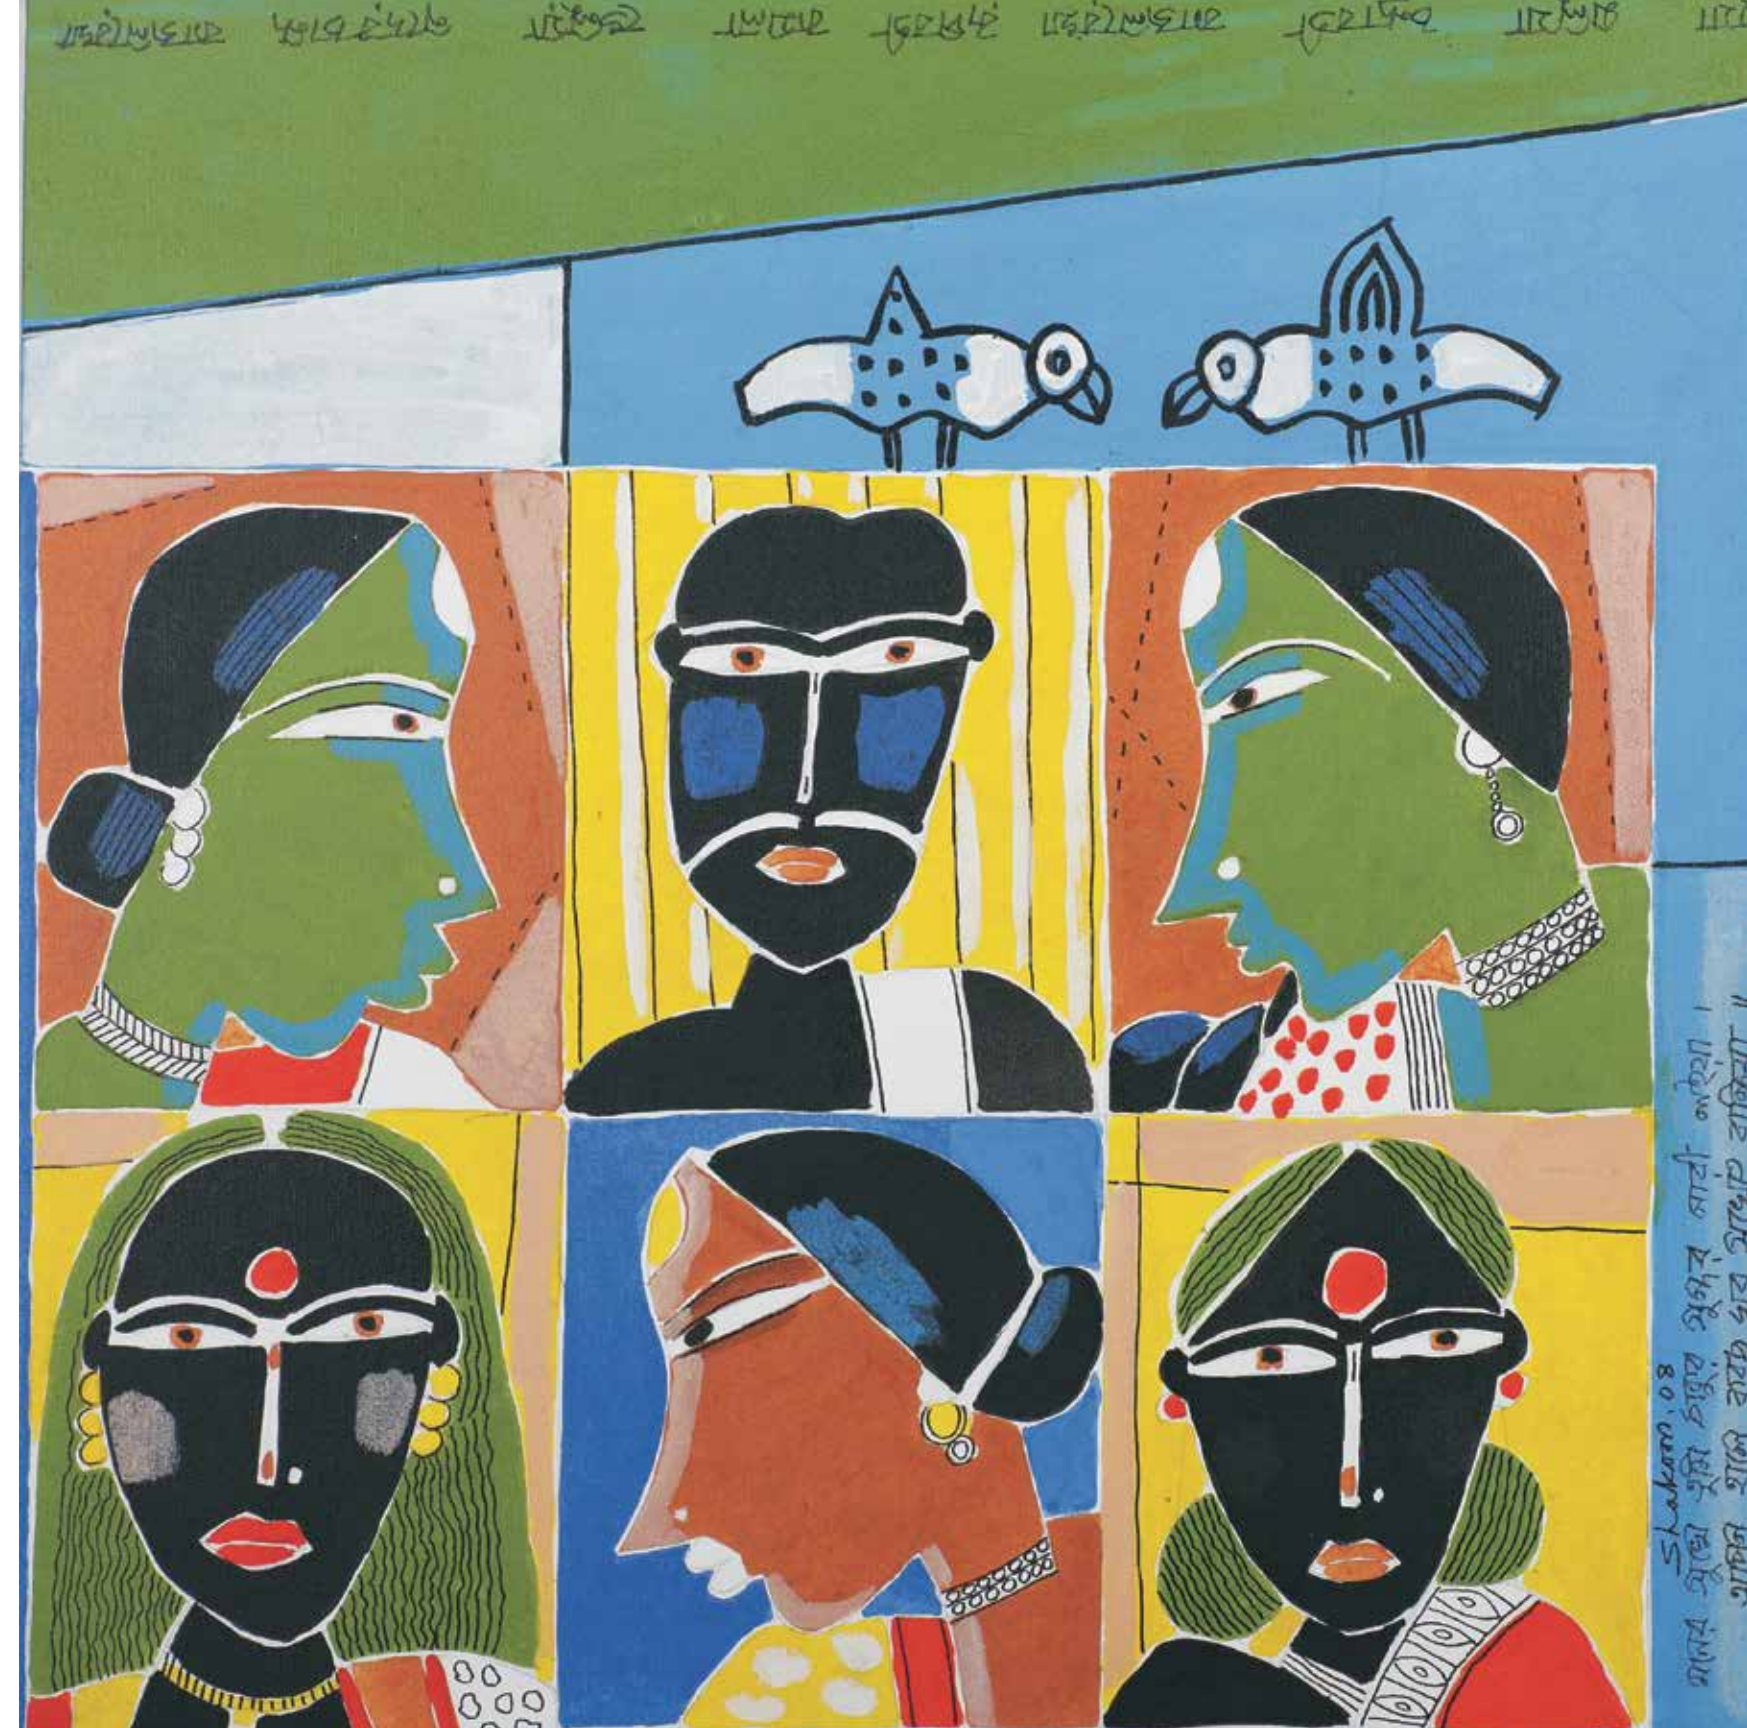

www.unb.com.bd

Founded in 1988, United News of Bangladesh (UNB) is the first fully digitalised wire service in South Asia. The Associated Press (AP), the world's largest wire service, is UNB's principal partner. UNB has established a network of correspondents and reporters in all 64 districts of Bangladesh and in strategic locations around the world. In concert with the central newsroom at Cosmos Centre, UNB journalists work round the clock to supply news, photographs and video content to its subscribers. With accurate reporting and journalistic integrity, UNB is recognised as the country's most dependable and credible source of news and information, serving some 20 million readers, listeners and viewers daily in Bangladesh and around the world. Valuable news exchange partnerships with leading international agencies have extended UNB's reach, making it one of the most trustworthy news organisations in South Asia. We remain committed to a policy of quality, reliability, innovation and leadership.

Abdus Shakoor | Untitled, 2008 / Gallery Cosmos collection

Dhaka Courier - An Independent Newsweekly

The Dhaka Courier, the highest circulation English newsweekly in Bangladesh, has been in publication since 1984. It has a combined readership of over 200,000 in print and online at www.dhakacourier.com.bd.

Distributed to over 50 countries, the Courier is often quoted at home and abroad for its sharp focus on political, environmental and human rights issues. Our independent editorial and reporting policy enables Dhaka Courier to attract contributors from among the best-known names in South Asian journalism. Dhaka Courier has remained at the forefront of Bangladeshi journalism for over three decades by reporting on various issues that affect the nation's fortunes, casting a piercing yet unbiased eye.

Pearls Paradise

The rich and exuberant cultural heritage of Bangladesh is depicted vividly in our traditional jewelry. Pearls Paradise was established in 1959, and incorporated in 1980 as a Private Limited Company; hand crafting jewelry, pink pearls, precious and semi-precious stones. One of Pearls Paradise's main product lines is setting pink pearls in gold ornaments. The pearls used are cultivated in the sweet waters of Bangladesh. Pearls Paradise Jewelry is handmade by its own artisans, belonging to a traditional class of craftsmen. Pearls Paradise plans to export jewelry abroad and is entering a joint venture with Australian collaboration for pearl cultivation.

Pearls Paradise has the privilege of supplying jewelry to such distinguished personalities as Her Majesty Queen Elizabeth II, Her Majesty Queen Sirikit of Thailand, Her Majesty Queen Fabiola of Belgium, the late Prime Minister Indira Gandhi of India, Prime Minister Benazir Bhutto of Pakistan, Her Majesty Rani Aishwarya of Nepal, Her Majesty Empress Michiko of Japan and His Highness Prince Karim Aga Khan.

Cosmos Printing and Publishing

Cosmos Printing and Publishing (CP&P) was established in 1985. CP&P is equipped with state-of-the-art technology for printing and publishing. We offer high-quality printing of books, periodicals, and technical journals. With the possible eradication of rampant piracy of books occurring in Bangladesh, the company is exploring the possibility of entering into joint ventures with reputed international publishing houses for printing and publication of books; thus aiding the people of Bangladesh to buy world-class books at affordable prices.

Bangladesh – Splendours of the Past

‘Bangladesh – Splendours of the Past’ was published in 2001 and its 2nd edition has been published in 2014. This book tells about the Land and People of Bangladesh, about the Prehistory of Bangladesh, about the Two Ancient Cities of Bangladesh, about the Ancient Universities, about the Medieval Heritage, about the Terracotta Treasures and about the Sculptural Glories. The tales of superior achievements of our ancestors are beautifully portrayed in this book.

Boats-A Treasure of Bangladesh

Artist Alakesh Ghosh, who is considered to be a “master of water colour”, according to fellow artist Samarjit Roy Chowdhury and Rafiqun Nabi, who calls Alakesh “his favourite student.” In his foreword, Nobel laureate Dr Muhammad Yunus acknowledges Alakesh’s generous personality by working to revive the medium of water colour assiduously amidst the art-loving public of the country. The book features artworks as old as 1974, such as “The Life of Snake Charmers”, using pen and ink on paper.

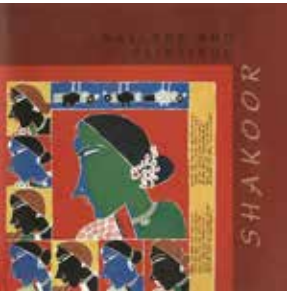

Boats-A Treasure of Bangladesh

‘Boats-A Treasure of Bangladesh’ was published in 2014. This book presents the rich tradition of boat making that has thrived in the lands comprising Bangladesh for Centuries. It contains vast information that brings out the history behind an entire repository of Bangladeshi culture.

The Bangladesh Sundarbans

‘The Bangladesh Sundarbans’ was published in 2011. This book unfolds the story of the biggest mangrove forest in the world. It describes the flora and fauna of Sundarbans and contains a treasure trove of information about the inhabitants of Sundarbans. It gives the readers an intimate glimpse into their lifestyle, beliefs, social mores, legendary myths and the mysterious bond that links them with the solitude of the forest.

Ballads and Paintings

‘Ballads and Paintings’ is a book featuring the works of eminent artist Abdus Shakoob Shah. He is widely recognised for his folk motifs and ballads rooted in the centuries-old tradition of the country. The ballads of *Mymensingh Geetika* - the famous Mahua and Malua love stories, *Nakshi Kanthar Maath*, *Gazir Pat* and *Manasha Pat* are recurring themes in his works. Osman Jamal, South Asian contributing editor for Asian Art News and World Sculpture News, art critic Moinuddin Khaled and Prof. Nazrul Islam have also written for the book.

Our Social Commitment

Cosmos Group enshrines a deep-rooted commitment to supporting young talents for higher studies as part of our contribution to society. Cosmos-sponsored awards have been established in various branches of education, including journalism, medicine, engineering and architecture, fine arts, law and business management.

Cosmos Group is a committed supporter of a variety of community activities in the media, health, charitable, and artistic fields. For example, the group pioneered the promotion of a very successful anti-tobacco movement in Bangladesh, especially through ADHUNIK, a recipient of the WHO gold medal for 1991-92 and 1992-93.

Cosmos has recently instituted a trust fund at the Asiatic Society of Bangladesh, to promote research in defence-related subjects. Cosmos Group also continues to support the Wildlife Trust of Bangladesh, the Noazesh Knowledge Centre, and the Bangla Mountaineering and Trekking Club.

In recognition of the evolving nature of our firm, Cosmos Group is a firm believer in an organization's social responsibility towards the community. We serve and aim to be a driver of social change in Bangladesh through the scope of its activities on a global level. The fruits of Cosmos' endeavours are evident throughout the social landscape, and we aim to further contribute by seeking direct opportunities to aid the citizens of Bangladesh.

Zainul Abedin | *Rebel Cow*, 1972 / Gallery Cosmos collection

COSMOS
FOUNDATION

*Engaging the Nation,
the Region and the World*

Cosmos Foundation is a philanthropic arm of the Cosmos Group, registered as a trust dedicated to providing strategic insights and policy solutions to help Bangladesh chart its course toward a better future, apart from discovering, cultivating and disseminating for a global audience, the art of Bangladesh.

The Foundation also oversees the group's abiding commitment to nature and heritage conservation, where its award-winning work has forged working relationships with institutions of world-renown, such as the Smithsonian. In executing the group's corporate social responsibility, it works through a variety of arrangements, often in partnership with specific individuals and thought-leaders specialised think-tanks and scholarly institutions. It also leverages the group's media holdings, facilitating critical engagement on the most important issues of the day.

Cosmos Foundation raises awareness of mental health issues by organising art, music and sports events featuring differently abled individuals. Cosmos Foundation is organising Bangladesh's first ever festival of disabled artists in collaboration with UNESCO.

The Foundation provides direction to the Group's flagship curatorial space, Gallery Cosmos, and its pioneering printmaking studio, Atelier71, which work in tandem. The purpose is to propagate the efflorescence of the rich Bangladeshi tradition of the (fine) arts, spanning multiple spheres. These include special collections, curatorial research and compelling exhibitions.

Through its collection of galleries, exhibitions, publications, symposia and digital platforms, the Foundation aims to engage both local and global audiences in artistic and intellectual interventions that aim to illuminate the past, examine the present, and imagine the future.

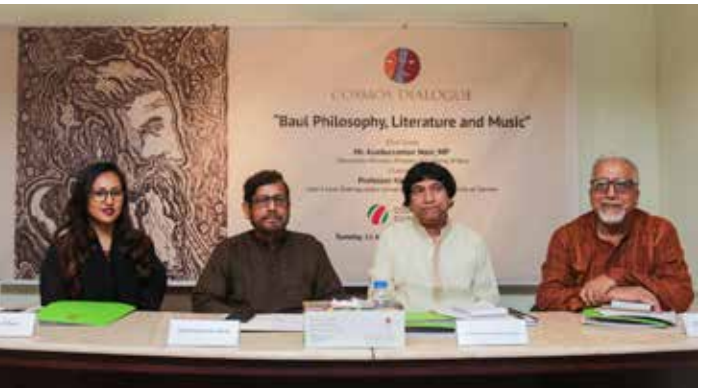

COSMOS DIALOGUE

Understanding through Debate

The Cosmos Dialogue, a core mission of Cosmos Foundation, is intended to be a conversation starter that will lead to healthy discussions and deepen our understanding of some the most pressing issues of our time. The Dialogue seeks to promote a culture of constructive debate and tolerance that can act as a bulwark against violence and confrontation. As Rabindranath Tagore said: “Where the clear stream of reason and thoughts has not lost its way in the dreary desert of lowly habits and deeds”. At Cosmos, we firmly believe that a vibrant democracy needs a continuous exchange of views between stakeholders and that the participation of citizens in the everyday political and socioeconomic process strengthens our democracy further. Taking advantage of state-of-the-art facilities at Cosmos Centre, the Cosmos Dialogue relies heavily on digital technology to bridge physical distances and help bring people together. Cosmos Dialogue takes the discussion beyond Bangladesh’s borders and engages regional and international partners.

Gallery Cosmos is a contemporary arts space that aims to facilitate creative interventions and collaborations among Bangladesh's growing band of young artists who are pushing the boundaries of our conception of art, as well as established luminaries. In doing so, Cosmos seeks to uphold the breakthroughs achieved here in front of a global audience, so that they too can take their place, in our world's globalised heritage.

This space is dedicated to artistic activities, such as visual art exhibitions, both traditional and modern, art-talks, workshops, art-camps, exchange programs; as well as interactions, art residencies, sponsoring, publishing, grants, scholarships, fellowships, and awards. Gallery Cosmos has one of the best collections of modern and contemporary art with over 11,000 original paintings, sculptures, prints and photographs. All of the major South Asian artists are represented. There are also works by prominent international artists such as Picasso, Salvador Dali, Chagall, Miro and Gallery Cosmos has one of the largest private collections of paintings by internationally renowned artist Kerry Hallam.

Cosmos Atelier 71 is an integral part of the artistic vision Cosmos seeks to serve, in the form of a printmaking studio housing state-of-the-art equipment that is extremely rare in Bangladesh. It aims to break new ground by acting as an incubator for the emergence of the graphical arts in Bangladesh. To that end, it focuses on encouraging young printmakers to develop their craft before presenting them with pathways for a future in printmaking.

We also offer residency program for leading artists from around the world where they can experiment with alternative methods and materials. This combination of residency program, gallery and our print-making facilities makes Cosmos Atelier71 one of the most desirable destinations for contemporary arts in South Asia.

WildTeam

Wild Team started out as the Wildlife Trust of Bangladesh in 2003, the initiative of a small group of dedicated conservationists led by Enayetullah Khan, with the aim of protecting the rapidly disappearing natural assets of Bangladesh. In 2012, the organization was rebranded as WildTeam, giving it a fresh new look that represents its identity and objectives in a better way. WildTeam is based in Bangladesh and governed by Bangladeshi board members. WildTeam was also registered as a charity in England and Wales in 2012, to support the Bangladesh work and to create a base to help save tigers and other wildlife internationally.

WildTeam is the implementer of USAID's Bagh Activity. Bagh achieved many remarkable feats in its efforts to save tigers and the Sundarbans. Honorable Prime Minister Sheikh Hasina also showed her support to the noble cause by visiting the Tiger Caravan during a function at Bangabandhu National Stadium marking the Independence Day.

WildTeam works closely with the Bangladesh Forest Department and the Ministry of Environment and Forest to support them in their role as custodians of the country's wildlife and wilderness.

In 2008, WildTeam merged with the Sundarbans Tiger Project (STP) which is currently known as Tiger Team Initiative, a joint initiative of the University of Minnesota and the Bangladesh Forest Department. Currently, WildTeam is leading the implementation of USAID's Bengal Tiger Conservation Activity under the guidance of the Forest Department, and with technical support from the Smithsonian Institution, USA.

www.wild-team.org

The Noazesh Knowledge Centre

November 2010 marked the collaboration between the WTB and the Zoological Society of London. As more bookshops in the capital city closed to make way for fashion and fast food outlets, its establishment appeared to be a dubious investment for many; however the WTB and the ZSL have agreed to contest the current decline of bookshops in the city. NKC was inaugurated to coincide with the first death anniversary of Dr. Noazesh Ahmed, the founding vice-chairman of the WTB, whose work as a nature photographer and researcher on the flora, fauna and agriculture of Bangladesh made him the country's pre-eminent naturalist, Bangladesh's very own David Attenborough.

The NKC is the first institution of its kind, open to educators, researchers and students. In keeping with the spirit of the late, great, Dr Ahmed, NKC aims to be a first-rate data bank on the status, distribution, and history of the country's natural resources.

Cosmos Learning Centre

Cosmos Group has set up the Cosmos Learning Centre with state of the art facilities and many rare and old books, underlining a corporate philosophy that recognises knowledge as central to all we do. We believe that the development of human resources requires the handing down of values and perspectives as well as professional skills.

As the demands on today's professionals continue to rise, Cosmos has increasingly focused on a corporate culture which has learning and training at its core.

With the mission of continuous learning, personal development and improving, Cosmos Group has established the Cosmos Learning Centre at its corporate headquarters. Cutting edge facilities, including around 20,000 books, DVDs, and other learning materials, beckon invitingly to anyone who wishes to broaden his or her horizons.

Bangla Mountaineering and Trekking Club (BMTc)

Bangla Mountaineering and Trekking Club (BMTc) was instituted in 2003, creating awareness for trekking and prep training. It was founded by Mr. Enam Ul Haque, the first Bangladeshi to reach the North Pole and Antarctica. BMTc has initiated significant expeditions, including a 60 km urban trek from Manikganj to Dhaka in 2005, an expedition on Chulu West mountain, Nepal (Height: 21,049 ft.) in 2007, an expedition to the Frey and Mera Peaks of Himalayan range in 2008, and recently, a joint team of Nepali and Bangladeshi mountaineers successfully scaled the previously unclimbed Mt. Chekigo (6257m) on October 18, 2010. The expedition was sponsored by Cosmos, and the peak located in eastern Nepal has officially been named the Nepal-Bangladesh Friendship Peak.

Promoting Culture

Cosmos Group Takes Baul to Broadway

Cosmos Group had co-sponsored along with World Music Institute (WMI) to take renowned Baul singer Shafi Mondol to New York for a solo concert at at Symphony Space, New York's premier performing arts centre on November 2, 2013. This was the first-ever event when a Bangladeshi artist performed at WMI's invitation, where he enthralled the audience and left them bewitched with his rendition of Lalon songs.

Cosmos Brings Lokkhi Terra to Dhaka

Cosmos Group brought the internationally renowned band Lokkhi Terra to Dhaka to play a series of intimate gigs that showcased their genre to the Bangladeshi audience – an eclectic blend of Latin and Afro-Caribbean beats fused with a distinct Bengali flavour.

We support various international and local musical bands for their collaborative performances in order to facilitate participation of Bangladeshi bands in World Music Festival.

A Display of Classical Dance of Sharmila Banerjee and her Crew

Sharmila Banerjee is a very famous dance artist of Bangladesh. She is the head of the dance department at Chhayanaaut and is the founder and director of her own dance institution of Nritya Nandan in Dhaka. Cosmos Group organizes display of classical dance of Sharmila Banerjee and her Crew Members to promote the classical dance to the diversified international business and diplomatic leaders operating in Bangladesh.

“Natir Puja - the Court Dancer” - a 3D recreation of Rabindranath Tagore’s only film

“Natir Puja – The Court Dancer” was unveiled at the 2016 Cannes Film Market, directed by Karl Bardosh, Hungarian-born American academic and filmmaker, after it was destroyed in a fire in the warehouse of New Theatres studio in Kolkata in 1933. Enayetullah Khan was the Executive Producer of the 3D version of the film.

“The Damascus Cover” – a film based on a novel authored by Howard Kaplan.

Enayetullah Khan is the Executive Producer of the movie about an undercover agent who navigates the precarious terrain of love and survival during an undercover mission in Syria. Directed by Daniel Zelik Berk, the film stars Jonathan Meyers and Olivia Thirlby, among others.-

**THREADS
A documtary film**

Cosmos Foundation supported the Bangla version of ‘THREADS’ - an intimate portrait of 85-year-old Bengali artiste, Surayia Rahman, who transformed the quilt-work tradition of Nakshi Kantha to create possibilities for a better life for her family and hundreds of destitute mothers in Bangladesh. Cathy Stevulak’s documentary on the ancient indigenous art form won critical acclaim and garnered several awards.

Her Words: Storytelling with Saris by Monica Jahan Bose

Monica Jahan Bose's masterful storytelling brings to life a collaborative printmaking, advocacy and story project highlighting the impact of literacy of women in the remote village of Katakhal. Cosmos Group was proud to sponsor Storytelling with Saris, in which Bose tells the tale of 12 Katakhal women who have survived and thrived despite facing natural disasters.

UNB Connect – A Free Public Web Portal

Founded in 1988, United News of Bangladesh (UNB), is the first fully digitalized wire service in the private sector of South Asia. Associated Press of America (AP), the world's largest wire service, is UNB's principal partner in news exchange. UNB has established a network of correspondents and reporters in all 64 districts, and around the world in strategic locations. In concert with the central newsroom at the Cosmos Centre, the UNB stable of journalists works fervently to supply news, featuring photographs to its subscribers. With accurate reporting and journalistic integrity, UNB is recognized as the nation's most dependable and credible source of news and information, serving some 20 million readers, listeners, and viewers in Bangladesh daily. Valuable news exchange partnerships have been established with leading international and national agencies. UNB has set the benchmark as the fastest and most credible national news agency in Bangladesh. We remain committed to a policy of quality, reliability, innovation and leadership.

‘Bangladesh Discovery Ride 2014- Explore the Diversity’

In an effort to seek exchange of knowledge and culture and to promote tourism within the Chittagong region, Cosmos Group sponsored the Cog-way Japan Cycling and Cultural Exchange Association for a three-day event titled “Bangladesh Discovery Ride 2014 – Explore the Diversity”, which was held on November 21-23.

Over 100 local and foreign cyclists took part to ride in areas around Chittagong. Yuriko Ueda, general manager of the aforementioned exchange association, expressed her desire to provide the participants with an opportunity to cycle their way through a vivid Bangladesh – all while striving to support the local tourism industry and showcasing the indigenous uniqueness and natural beauty of Bangladesh on a yearly basis.

“Cycling also has the power to connect people beyond language, culture, religion and ideology,” she added.

The event commenced in Chittagong on November 21 and ended in Cox’s Bazar on November 23.
